P-RMB Universal Mounting Bracket

Application

- Mounts to any Roof Structure
- Single Hole Penetration
- Works with any 3/4" Post Hydrant
- Powder Coated Steel Design

PRIER's P-RMB Universal Roof Hydrant Mounting Bracket provides a means to attach any 3/4" post hydrant to a roof structure, thus providing a simple water source on the roof of a building. PRIER's Mounting Bracket is compatible with PRIER's P-RH1, P-RH2 and P-RH3 Commercial Roof Hydrants.

The Roof Mounting Bracket enables the hydrant to be mounted to any structural member with rigid support, instead of to the skin of the building like competitive products.

This bracket requires only a single penetration point of 1 3/4", and can be mounted to concrete, wood, steel, I-beams, truss, perlin or other structural members with standard construction materials (unistrut, all-thread, or other).

Features

- Mounts to any roof structural member (truss, I-beam, concrete roof, etc.)
- Compatible with PRIER's P-RH1, P-RH2 and P-RH3 roof hydrants
- Single hole penetration of 1 3/4"
- Single person installation with standard tools
- Seals with standard roofing materials
- Works with any 3/4" post hydrant
- Designed to be installed with standard construction materials (Unistrut, all-thread, etc.)
- Powder coated steel design
- Adjustable to accommodate roof angles up to 4/12
- Bracket and hydrant can be installed independently

Specs

Furnish and install Model P-RMB Universal Roof Hydrant Mounting Bracket manufactured by PRIER Products. Bracket must be manufactured of heavy gauge powder coated steel. This bracket is to be installed inside the structure and must have a single penetration through the roof. This bracket must allow for adjustment to meet roof angles up to 4/12. It also must connect to I-beams, steel, truss, wood or concrete with standard construction materials. The roof penetration is to be sealed by the roofing contractor in accordance with roofing codes and conditions in their municipality.
